

DECALEX Mechanical inter-row vine cultivator

I CULTIVATE MY VINEYARD: LIGHT TILLAGE IMPLEMENT

For cultivation as near as possible to the vine trunks.

SUPPORTS

ADAPTABLE PARALLELOGRAM MODULES

MECHANICAL WEEDING

MOUNTS
FOR POLE

MOUNTS
PER TINES

72 kg per pair

Mechanical
function

All vine row
widths

The DECALEX undervine cultivator executes light tillage (3 to 5 cm) in close proximity to the vine trunks. It is equipped with a versatile parallelogram support that facilitates the mechanical retraction of the tool (sensor). Continuous spring safety features safeguard the vine bases, while the vine-cleaning tool delivers an impeccable finish.

BENEFITS

- Effortless and efficient installation on a multifunctional support.
- Light tillage implement facilitating shallow cultivation (3 to 5 cm)
- Appropriate for all soil varieties
- Forward speed of up to 4 km/h
- Continuous spring safety measures to safeguard the vine trunks (SOUSLIKOFF exclusive)
- Special share advocating re-cultivation
- Adjustable gooseneck elevation
- Vine-cleaning implement for cultivation in proximity to the vine trunks.
- Mechanical retraction through a parallelogram mechanism
- Pin for minimized bulk and enhanced transportability
