43 kg per pair

Mechanical function

All vine widths

The VITALEX disc cultivates the soil while ensuring uniform tilling (light hilling). It is mounted on a versatile parallelogram support that mechanically retracts the tool (without a feeler). This design facilitates a high working speed (6 to 8 km/h) while safeguarding the plants, including the youngest specimens.

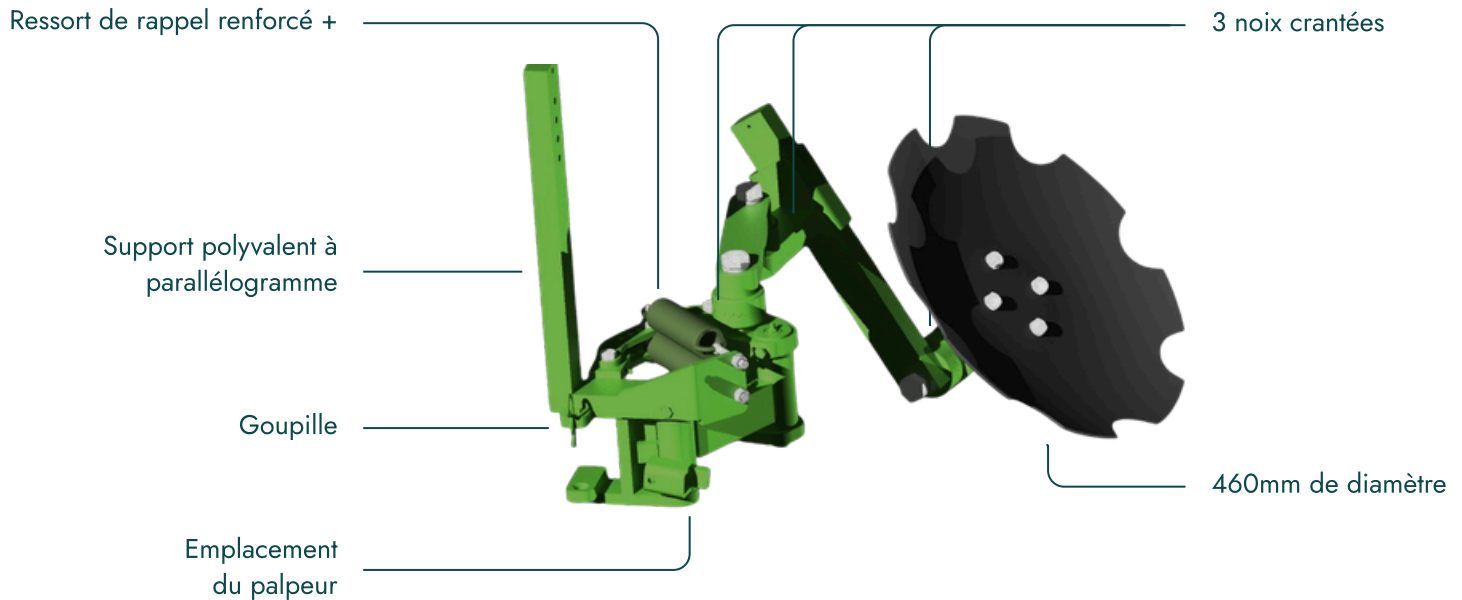

BENEFITS

- Effortless and efficient installation on a multifunctional stand.
- High operational speed ranging from 6 to 8 km/h
- Thoroughly remove weeds surrounding the base.
- Cuts and loosens the soil (clods) with the curved, serrated disc.
- Regulated Terrestrial Displacement
- Distance and angle of attack modifications through three notched nuts.
- Footwear safety for all ages
- Effortless and rapid assembly facilitated by the parallelogram mechanical support (allowing operation without a probe).
- Pin for minimized bulk and convenient transport
