

BINALEX

Mechanical inter-row weeding implement

I WEED MY VINEYARD: LIGHTWEIGHT TILLING IMPLEMENT

To hoe as near as possible to the feet.

SUPPORTS

MULTIFUNCTIONAL PARALLELOGRAM
MECHANICAL DELETION

SUPPORT
By perches

SUPPORT
By Gogues

72 Kg

Mechanical
function

All widths

The BINALEX hoeing blade operates at a shallow depth without disturbing the soil. It is mounted on a versatile parallelogram support that guarantees the mechanical retraction of the tool (feeler). A vine cleaner provides an impeccable finish.

BENEFITS

- Effortless and efficient installation on a multifunctional stand
- A lightweight tillage implement designed for efficient subsurface cultivation.
- Operating at a depth of 30 mm
- Continuous spring-loaded safety mechanisms to safeguard the vines.
- Lateral blade adjustment through a notched nut
- Forward speed of up to 6 km/h
- Mechanical removal via parallelogram support
- Pin for minimized bulk and convenient transport
