

I WEED MY VINEYARD: LIGHTWEIGHT TILLING IMPLEMENT
For efficient cleaning as near as possible to the foot.

SUPPORTS

MULTIFUNCTIONAL PARALLELOGRAM
 MECHANICAL DELETION

SUPPORT
 By perches

SUPPORT
 By Gogues

43 kg per pair

Mechanical function

All vine widths

The VITALEX disc cultivates the soil while ensuring uniform tilling (light hilling). It is affixed to a versatile parallelogram support that mechanically retracts the tool (without a feeler). This design facilitates a high working speed (6 to 8 km/h) while safeguarding the plants, including the youngest specimens.

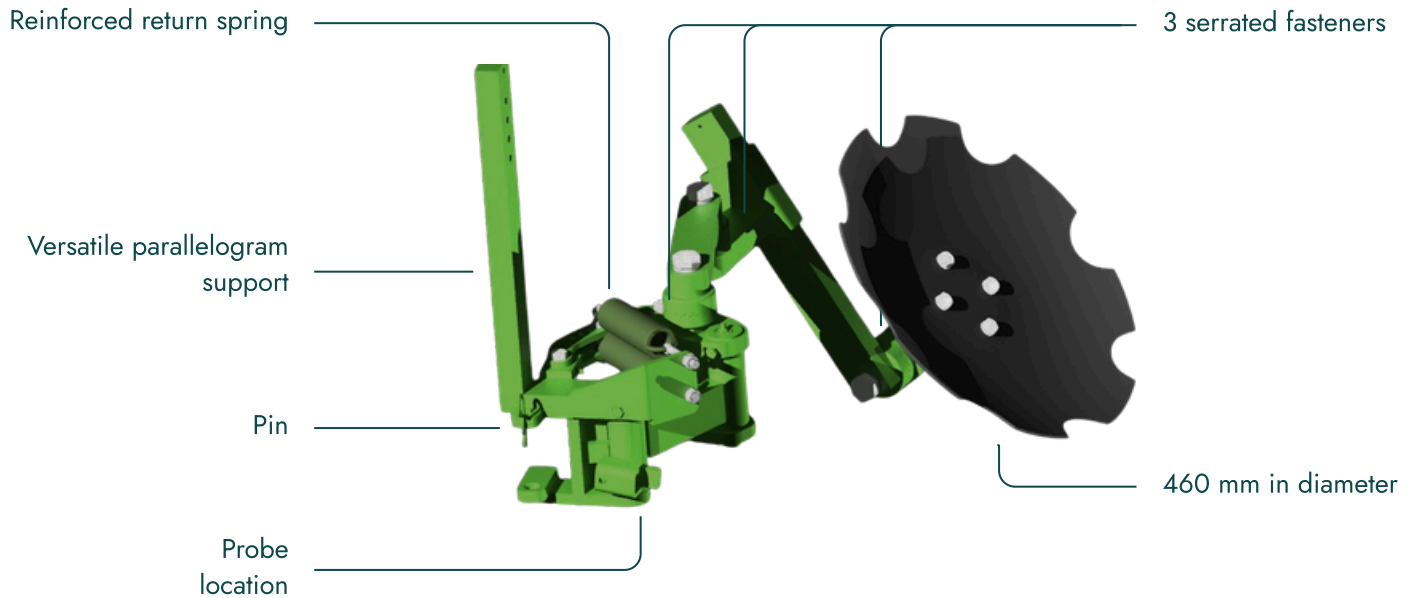

BENEFITS

- Effortless and efficient installation on a multifunctional stand.
- High operational speed ranging from 6 to 8 km/h
- Thoroughly remove weeds surrounding the base.
- Cuts and loosens the soil (clods) with the curved, serrated disc.
- Regulated Terrestrial Displacement
- Distance and angle of attack modifications through three notched nuts
- Foot protection for all ages
- Effortless and rapid assembly facilitated by the parallelogram mechanical support (allowing operation without a probe).
- Pin for minimized bulk and convenient transport
